

CONCEPT, FORMS AND CAUSES OF DOMESTIC VIOLENCE

Author- Sagar Singh

ABSTRACT

Domestic violence is a common problem that can affect more than a quarter of women. Domestic violence remains invisible. Women may not report exposure to violence against women is an act of gender-based violence that leads to, or can result in, physical, sexual or psychological harm or suffering of women.

INTRODUCTION

Threats to women are found all over the world. It is not a common plague that kills, plagues and harms - in fact, mentally, emotionally and financially. Apparently a common breach of opportunity and teaches the lessons of women and youth far removed from morals, self-esteem, pride, evidence and the benefits of realizing the importance of meaningful opportunities.

Anger towards women is open at the national level. Women are made as vegetable waste that is found in different cultures, classrooms and communities. An Indian woman is given a permanent bottomless man and should always be at his feet.

Through the (Protection of Women from Domestic Violence) Act, 2005 was given to women in power. In addition to crushing the powerful, direct and shocking drivers under Indian culture and empowering them to change at this social pace, they have been given the right to violate women's rights.

"The reality of women raises the bar of conflict between the interests of men and the oppression of women and those who contribute to the ownership of the full development of women.

Meaning of violence

There are various forms of harassment that convey the danger and anger to the membership of members. Some hostilities, violent attacks, spiritual programs, including harassment and destruction, and attacks are the most obvious forms of people involved in handing over power to their right hand. Harassment is needed to stay in control and reduce focus on the difficulty

of making a decision about a manager's decision, proximity to family property and resources, or confidence. Satisfaction with human trauma is usually not different from any other relationship. Two or three fakes are huge chunks of shocking time, some can rely on surprisingly reported hardships to prove their worth. Fear of disaster makes it difficult for her to trust her partner and family, because the reaction can be very dangerous (the event is actually for women, but all is not perfect). People are under pressure to take advantage of cruelty, to think about how they are oppressed, to suffer financially, to use orthodontics, and to drink excessively. no. Of course, these parts can accumulate material, anywhere near the misuse of services

Historical Theories Of Violence

Relationships and perspectives are wonderfully provided to clarify and promote sexual hostility. This is no longer considered obvious in the field.

- The concept of codependency recommends that overcoming bullying be the goal of their bad players. This true view of the sexual course ignores seeing the difference in power between people and suffers unjustly with the problem of danger.
- The view of public education is that men do not stop as they learn about the truth of their families, and women "look" at men who are dangerous when they see their mothers being beaten. In any case, the various exchanges of dangerous men and the brutal intercourse of men are not marred, and women who see the use of force are less likely to be abused than women who are not. Given the amount of common abuse, it makes sense for a woman to be abused from many sources in her life, but nonetheless, this is what she "sees" as abuse. In the end, the right hand is the one that decides to act violently.
- The concept of the need to study has suggested that the burden of harassment remains an abominable organization, considering how abuse arose deprives them of their willingness to leave. Indeed, the woman who draws the drawings takes some steps to get it for herself, and the persistent woman is forced to realize the importance of adding a little air is her sure decision.
- Conflict cycle hypothesis. If in doubt, combine three categories to convey their amazing combination. A deceptive section where the square is open. And the stage of the trip to bring back a woman with questions that demean dangerous behavior with shoots in Brussels. This, of course, creates a barrier to dating. Some women report that there has been no progress from the conflict, but there is a terrible and violent situation. Moreover, some have never seen

the "first night of shame." This is all very well illustrated by the "control class" as a whole, because it is not the way to control criminals when they do that.

- Systematic speculation sees harassment at a basic level as a possible and inevitable consequence of a breakdown in a relationship. This model confirms that these companions are shocked. The Board (1984) states that a systematic approach to assumptions is definitely dangerous if given how it allows relationship abuse and puts survivors at risk of abuse. The couple is expected to explode and get confused, but it is clearly a matter of whether they will get angry or not. Planning thinking can be applied to common problems in a relationship. Do not use it in the event that a relationship is abused.

Theories Of Violence

From the very beginning, social order around the world has caught and abused women. In the United States, measures to prevent satisfactory accidental abuse began mainly in the 20th century. Many continue to tolerate gender-based conflict as a registered issue. In any case, one in three women worldwide, and in the United States, is being wiped out and attacked with the right hand. It was not until 1993 that a surprise attack was considered a rare life in all 50 states. Having a general view of clarity behind dangerous trails at home helps the network to produce an effective response in noisy forums and circles. Some insight helps us to proceed without giving contradictory reactions that we can try to attack and think about a careful batter.

In the area and in various social structures, we have seen evidence of loyalty and that they expect or affirm that men are responsible (especially their families). This control creates an element of relationship power. The message we force young people (and educate themselves on) about masculinity and sophisticated plans is that men are on the verge of confirming their extremes and getting their right hand to do so. It shows us that we can do anything that is important to us. They must either do as they are told.

An attractive perk at home is a beautiful short film in Hawaii. If you hurt someone you love, you will see that a straight home is glorious and illegal and the value you can get from the opportunity to make this awesome profit. However no one can stop the truth and there are local alliances that can help you gain the ability to stop the disgust you create in your private partnership. Alleged domestic violence and social problems brought on by far-flung institutions. They can be heard, they practice religion, they are in a well-paying position, they lose their jobs, they use fines to drink alcohol, and they overcome youth abuse. As true home winners, we can help you plan the options you can consider now or later. Our engagement is about helping you feel safe and free from the fact that you are ultimately experiencing the irreversible consequences of your well-respected but cultured people. Understand with confidence that you are showing a brilliant personal model. It's not your inability to function properly. The Domestic Violence Center provides a private and informal partnership.

CONCEPT OF DOMESTIC VIOLENCE

A term risk indicates a certain power to a person or property, or a fine or injury.

Oxford Dictionary 9 shows that:

"The shortest truth is possible, such as expecting as much energy as possible, or killing people or things. The Amazing Benefits of Home The kind of truth is to see what really promotes a direct and dangerous direct show at home. for women get deceptive property, and other abuse.don't control parents by law, cold power by life partners or screen by law Sensitive or vulgar abuse Abuse and anger, rebellious behavior, anger, blocking new development, assault, homosexuality and additional pagan representations using ours in all of the above, women look abuse and harassment It is considered as one person.

In India, where the most important part of everything is women, women are beaten and denied the skills and opportunities of individual life, as provided for by the Constitution of India. While women are always considered to be truly honest and more sensitive than men, in the show women actually remain knowledgeable in all aspects of their lives and do interesting work at home and at work. Thinking suggests that he is not a man. .. In the secrecy of the house in our country, people are abused, beaten and stabbed. This happens in common areas, in local governments, in big cities, and even in big cities. It goes through all the affirmative classes, sex studies, races and age groups. It turns into an inheritance that dies first over a period of years and then years. However, crimes against women reflect the well-established fact that women are generally insecure and unsafe. The disturbing trend towards women is recorded in an irresistible and vague way, as expected in India, as indicated by a recent report from the National Crime Records Agency (NCRB) of India. According to a standard event, two women were attacked in the country. In all cases, generous and vulnerable women were found to have been beaten to death, imitated or fallen. Violence against women is clearly not a major issue. Women need to stand on a diet that is close, open, real, healthy and spiritual for women. This has a profound effect on the general public. The experiences of violence against women are staggering: women witchcraft, child murder, forced contempt, child participation, purposeful eating women, teenage sexual abuse, forced society. If you think of vicious attacks such as involvement, assault, and prostitution Let's take things home. In all of the above cases, the woman is considered the victim.

The term "domestic violence against women" refers to shows and demonstrations that may harm or injure women, psychologically, internally, socially, and within four parts of the house. It means action. It's done for sure, not by outsiders. 15

In India, where half the population are women in every possible way, women are inevitably abused and deprived of their right to life and opportunities, as provided by the Constitution of India. Women are certainly considered more truly and truly kind than individuals, but in the meantime, by ensuring that women are not men in an effort to excel at home and at home. I feed a lot in every aspect of my life. Dirty work. In the secrecy of homes across our country, people are tortured, beaten and killed. It occurs in districts, local governments, metropolitan associations, and metropolitan areas. It has gone through all sorts of glamorous classes, sexual desires, racial lines, and age groups. What starts from time to time and what the future holds is far from heritage. However, crimes against women reflect the sad reality that women are rare and safe everywhere. According to a recent report, sponsored by India's National Crime Records Agency (NCRB), the poor health of women in decent conditions has been recorded in India. Two women are often attacked in the country. As expected, a young married woman was found beaten, eaten, and unconscious. Violence against women is clearly not surprising. Women need to tolerate the greed of intimate, public and real people, as well as the extreme spiritual depravity of women. The experience of committing horrific acts against women is staggering: women are brutally assaulted, such as child abuse, child murder, neglect of clinics, child involvement, female divorce, child sexual abuse, forced involvement. Not only are you aware of attacks, prostitution, dirty straight homes, but you also have a job to put on and on. In all of the above cases, the woman is considered the victim.

DEFINITION OF DOMESTIC VIOLENCE UNDER PWDVA

1. Harmful Direct Home Strategies - For inspiration to drive this law, respondent attendance, engagements, delegations, or leads promote amazing leads at home, just in case.

(A) Deteriorated personal prosperity, safety, life, limbs or sufficiency, mental or physical or otherwise restricted, or usually restricted by the union, genuine abuse, sexual abuse, linguistic and psychological abuse And related abuses that cause harm, hurt, or endanger money; or

And all or any financial resources or inconvenience of financial resources. Of these, Stride, moved together or autonomously from the lonely abused rent section related to the needs of the disturbed individual and her children's family, customary family and sponsorship. , The desire to be a fortune.

(B) Exemption from family impact, potential for deterioration of both adaptable and suffering assets, resources, allocations, insurance, protection, etc. Or the abused individual has a load due to close relationships, is ready to use, or has been or independently by a dismissed individual or his child or his Stride or other property. Other assets individuals that may reasonably need to be held from frustration;

(C) Denial or termination of continuation by the approval of a resource or workplace in which the abused individual is unable to control community relationships, including normal family membership, and is ready to practice or enjoy. Description II.—The factors of the case and the overall actual condition for inspiration that the defendant's showcase, horror, committee, or guide will guide the choice of whether to set up a "solid home" in this part. It will be considered.

CAUSES DOMESTIC VIOLENCE

Extreme home traits are welcome in hostile and hostile abuse, although they are called close to abuse, but begin when one partner needs to control and defeat the other. Something is possible.

Victims are educated or financially established as a result of problems with superstition, insignificant jealousy, panic and other unusual speculations, or when they feel inadequate. You may need to check with your companions, as it has become increasingly clear that they could be compared to traveling with you.

Some dating quotes may seem to have more control over their peers, and women are not defined by men. Some may have hidden social or psychological problems. And some may have taken this guide to meeting young people in a family where a more home-based life was seen as a normal part of their family growing up.

Decorative controls can show up as bright red physical or sexual abuse. Research suggests that the invisible reeds are always cultivated by the combined efforts of nature and parts. It suggests that, as they grow older, low-income people put their own desires directly into their families, the environment, and other social influences. They may have been aware of the anger at times, or they may have been in trouble themselves. Some lowly people believe that they have grown up being treated like teenagers.

A young person who is a witness or who conquers anger can devise a way to deal with the idea that evil is a sensible way to choose a war between people. Young people who see that women should not be respected or respected and see violence working against them undoubtedly mistreat women as they grow older. Young people who see violent driving at home during an opening meeting are actually being handcuffed by their life partners. Despite the fact that women are always successful in amazing outcomes at home, sex-surviving technology is rare and unchanging.

Alcohol and preparations can be added directly in a negative way. At length, the green people are reluctant to control the shocking motivation of their partners. Therefore, keeping this drinking and medical practice in mind can be important for a person living in a stable environment at home.

Apart from formal exercise, there is no legitimacy that leads to homes. Also, they should not be used as their direct suspects. These potential causes make it easier to understand why the defendants believe that their extras are extraordinarily wise or can be treated in the most

important places. That. Over time, failure will need to gain support for their unpleasant and hurtful behavior, or it will continue with some canceled life.

CONCLUSION

Friendship is a very important factor in a large number of people, since no man or woman is immune to each other. "Man and woman are two parts of humanity. And they cannot be seen in the highest sense without some co-operation. However, gender segregation is a fundamental way of life in any part of the world, especially in India. is concerned that a man has abused women his will, used it as a way to deal with his vanity, to teach his happy life, to contribute to the pursuit of his own comfort; In the world. family history is relatively large Without a doubt, even the most discerning, beautiful, sensible, and outspoken people on the outside will reveal their inner motivation. Amidst the abuse of women the "big lead in the home" is the most honest crime because it happens with insecurity within the home dividers.
